Phishing Awareness Test

# Phishing Awareness Test

## Strengthen your human firewall

Cybercriminals exploit the unfamiliar situation of most of us working from home. They increasingly send malicious phishing emails and SMS (smishing). We have seen numerous examples of cybercriminals impersonating health authorities, Netflix, internal company employees, and more. Therefore, it is important to take precautions during this time. Raise awareness among employees and educate them on how to protect themselves.

Through a Phishing Awareness program, you will enhance employees' ability to resist phishing attacks. The focus will be primarily on education rather than testing employees.

### Benefits & Value

- Insight into employees' maturity level regarding the threat of a malicious phishing attack.
- Learning elements that create optimal conditions for employees to understand what they should be aware of in a potential phishing email.
- Good advice and guidance on how to protect against phishing attacks.
- Enhancement of awareness and security levels internally within the organization.
- Strengthening your human firewall.

# Embracing Human Error:

## Turning mistakes into meaningful insights

In the event of an employee clicking on a link, downloading a file, or opening an attachment, an automatic redirection to a dedicated website can provide guidance on the error committed and highlight key points to be vigilant about. This method serves as a valuable educational tool, enhancing comprehension, increasing awareness, and fortifying employees against external threats. This educational approach is further reinforced by a phishing awareness video, aimed at instructing employees on identifying phishing emails and safeguarding both the organization and themselves from cyber threats.

### **Minimum Requirements**

The following are the minimum requirements for conducting a Phishing Awareness Test:

### **Phishing Awareness Test:**

- Whitelisting of sender domain
- Provision of email addresses (CSV or Excel file)
- Notification to operations manager/partner

### **Awareness Video:**

No specific requirements; we provide a system where the video is displayed.

### **A Phishing Awareness Test program includes:**

- 1 Phishing Awareness Test
- 1 Landing page with do's & don'ts
- 1 Awareness video
- 1 Report
- Setup included
- Sending included
